Judith-

Meant to say "reconfigured" instead of closed. And, more specifically, when chrysotile was no longer being used.

Thanks.

-Robert

Thanks Judith. Do you know when they closed it? Thanks for that info if you have it.

See you Monday.

-Robert

Dear Robert,

Olin closed its chlor alkali plant in Henderson, Nevada and reconfigure the facility to manufacture bleach and distribute caustic soda and hydrochloric acid in March 2016.

See you on Monday,

Judith

Hi Judith- We found a record of an Olin plant that used chrysotile diaphragms in Nevada but I didn't see it on the list of plants that currently use the diaphragms you provided us. Was chrysotile use discontinued at that plant?

I look forward to the 10/30 meeting with Chemours and their supplier on gaskets.

Best,

-Robert
